Conrad,  
I am sorry but somehow I have lost both of your notes. YOu mentioned something about a "startup package" and I wanted to get back to you

about that.  
Could you e-mail me again.  
Tnx  
Father Bowes

>China (PRC) has just recently started issuing BA calls, according to  
>a net news source. Can anyone confirm this?

Bob,

Yes, I have worked a couple on 40 m cw recently, can't remember the calls,  
don't have my log at work, BA1AT was one I think.

Would sure like to work the glowbug net from VK, but the times are a bit  
out. Can work the USA from about 1000z on 40 m but its been very patchy  
lately.

Hi guys,

Saw some recent discussion on the list about Variacs. While poking  
through my junkbox I found a Variac aluminum dial plate, 4-inch  
diameter, black with silver numbers 0-110 on one side and 0-130 on the  
other. It's a bit banged up but not disreputable. Will give it to  
anyone who needs it for a nice controlpanelus glowbugus.

The Variac dial plate has been claimed. My thanks to all who responded to my offer.

Hello Glowbug types,

I need to find an 8ma to 10ma meter for a Heath novice xmtr. Prefer the square plastic Heath type or an older open face round meter. The unit is the HX-11. Also open to suggestions. FAIR was a dead end or got the wrong salesman on the line. Surplus City wanted \$45 for unseen type, description "unavailable"...arrggggghh.

Also seeking some heavy RF decking and a bullnose modulator for bulding up a 160 meter thunderfoot. No effort spared for acquiring same. Have dog, cats, goldfish, rude neighbor for trade for same.

Very 73 to all,

Doug WJ5J (formerly WA5BQA)

For those of you in need of ma meters, I suggest you go to Radio Shack and pick up one of their inexpensive multitester meters to use until you can find an authentic replacement.

Maybe you can even perminently install the RS meter if you don't mind not having an "original."

Jeff KH2PZ / KH6
